CLAUDE HAIKU 5.5

5 jobs to hand Haiku

Your cheapest Claude model reads up to 1M tokens. These are good first jobs to try on it. Paste the prompt, swap in your own material.

1. **Sort a pile**
   `"Here are 200 comments. Label each one: question, complaint, praise or spam. Return a table."`

2. **Summarize long documents**
   `"Summarize this document in 10 bullets, then list 3 questions it leaves open."`

3. **Write rough first drafts**
   `"Write 5 rough captions on this topic. Do not polish. I will pick one."`

4. **Pull fields out of messy text**
   `"From these 50 client emails, pull name, company, request and deadline into a table."`

5. **Use the big context**
   `"Here is my brand guide and 20 past posts. Write 10 hooks in my voice."`

Prices: Haiku 5.5 costs $0.10 per million input tokens for prompts up to 100K tokens, $0.50 past 100K, and $0.01 per million for text it already read. Try a job on Haiku first. Move up to a bigger model only if the result is not good enough.
